

# Pre-Lubricated Gasket

Direct from manufacturer

## Uses

for single offset joints

- Manhole
- Box Culverts
- Elliptical Pipe
- Reinforced Concrete Pipe

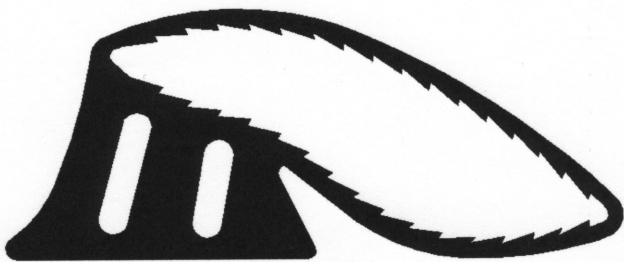

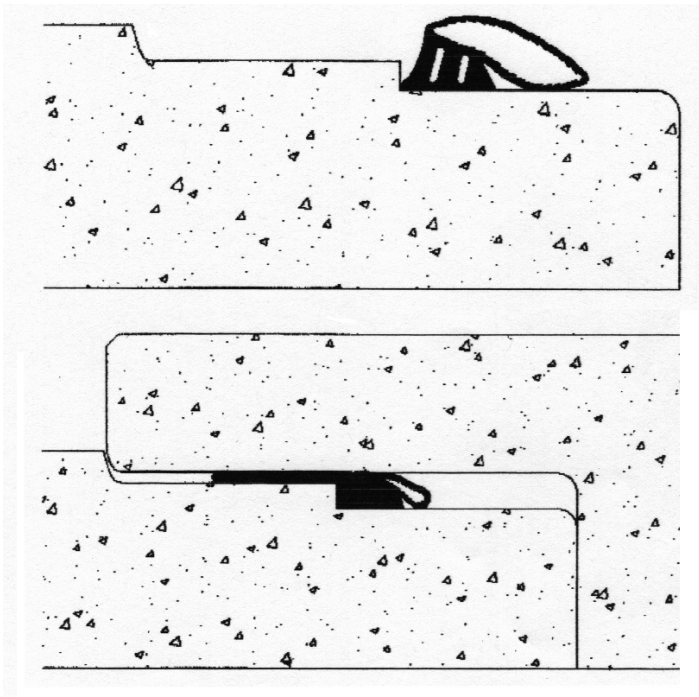

## Advantages

- Lubricant is factory installed prior to shipment, eliminating the instance of dirt or foreign material being attached to the outside of gasket during fitting.
- Contractor does not need to equalize the gasket after fitting to spigot.
- Little or no joint kickback.
- Lower insertion force.

## Specifications

The gaskets are manufactured to meet the following material specifications:

ASTM C425, C443, C361, CSA A-257  
AS1646, EN681
